PROJECTS

ELIXIR 🔗

Mern Project

📅 Jul 2023

- Elixir: It is a fully responsive and visually appealing platform designed to revolutionize the way students book doctor appointments and manage their medical history. Powered by MongoDB, NodeJS, Express, and React.js, it offers a seamless experience for scheduling appointments while securely storing comprehensive medical records, and doctors can efficiently access patient history and prescribe medicines. It has robust backend capabilities to handle API requests seamlessly, ensuring smooth data flow between the MongoDB database and the React.js frontend.

TINDOG 🔗

Frontend Project

📅 Aug 2022

- Tindog: A stylish and responsive platform that brings together dog lovers. Developed using HTML and CSS, Tindog provides a delightful user experience, allowing users to connect and explore potential furry companions in a visually appealing interface.

Banking System 🔗

OOPS Project

📅 Nov 2022

- Banking System: A feature-rich C++ project based on OOP concepts, offering account management, transactions, and secure data handling. Its modularity and user-friendly interface provide customers with a seamless banking experience, reinforcing trust and reliability.

ACHIEVEMENTS

- Completion of an Udemy Complete Web Development Bootcamp 🔗
- Completion of Software Engineering Virtual Experience Program 🔗

COURSES OF STUDY

- Object-oriented Programming
- Operating system
- Database Management System
- Data structures and Algorithms
